

EXPERIENCE

Full Stack Developer Mar 2025 — Present
FedEx Hyderabad, India

- Own features across 5 revenue applications (RCCE, GMD, FastBill, ISDM, BUDI) in ACC Invoicing & Controls — backend services, Angular modules, and CI/CD
- Lead Developer for FastBill (revenue-critical): designed File Feed → DB ingestion with backward-compatible GUI Excel upload; driving legacy modernization to Spring Boot / modern stack
- Architected a horizontally scalable distributed compare engine (Hazelcast IMDG + multithreading): raised throughput from 3.3k msgs/15 min to 80k/25 min (13x), enabling continuous production loads vs 3-month batch CSR cycles
- Built a Node.js automation test framework for GMDSVC; owned E2E design→deploy for ISDM/BUDI; resolved critical L3 and production defects on RCCE
- Owned production on-call, deployments, security/compliance, and Splunk-based observability across the portfolio
- Tech: Java/Spring Boot, TypeScript/Angular, Oracle SQL, Jenkins, CloudOps, Hazelcast, JMS, Node.js, Weblogic, ADF, Automic

Freelance Full Stack Developer Dec 2024 — Feb 2025
Finstack Remote

- Built features on a no-code digital lending platform (banks/NBFCs/fintechs): branch-entity refactor, role-logic simplification, and Lead-Onboarding variable search 30s → 2s (15x); improved Journey Builder with searchable forms and validated drag-and-drop sequencing
- Integrated third-party Bank Account Verification & Cheque OCR APIs; owned deployments/DevOps; mentored interns
- Tech: Flask (Python), Angular (TypeScript), Microservices, AWS, Docker, MongoDB, PostgreSQL, Nginx

Software Engineer - Apple Maps (via Unify Technologies) Aug 2022 — Jan 2024
Apple Maps Hyderabad, India (Hybrid)

- Built Elasticsearch fuzzy search for workstream/workforce discovery and Redis-cached MR count retrieval, improving selection accuracy by 90%+ and unblocking pilot → production; shipped and reviewed Plasma Carbon features
- Subject-matter owner for world workstreams: led knowledge transfer on selection strategies, unblocked Operations/QA issues, and partnered across Engineering, Frontend, and Support
- Tech: Scala, Play Framework, Microservices, Docker, Spinnaker, Elasticsearch, Redis, Apache Solr, MongoDB, GraphQL, Mockito, Splunk

Internships May 2021 — Jul 2022

- Rakuten India (Full-stack, EMP): revamped Event Management Platform home page; mentored a peer on Git, design patterns, and JWT
- Feature Ventures (Backend, contract): delivered campaign APIs (Collaborate, BOGO, Discounts) consumed by a React Native client
- Stylabs: full-stack intern on MaanFarms and Sur+ (Surplus)

SKILLS

Languages	Java, TypeScript/JavaScript, Python, Scala, C++, SQL
Backend & Data	Spring Boot, Flask, Node.js, Play Framework, JMS, Kafka, Redis, Hazelcast, Elasticsearch, Apache Solr, GraphQL, Oracle, PostgreSQL, MySQL, MongoDB
Frontend	Angular (TypeScript), HTML/CSS
Cloud & DevOps	AWS, Docker, Kubernetes, Nginx, Jenkins, Spinnaker, Splunk, Git
Practices	Microservices, Distributed Systems, CI/CD, Unit & Integration Testing (Mockito), On-call / Production Support

EDUCATION

BTech, Computer Science, ABV-IIITM Gwalior Jul 2018 — May 2022
